SUMMARY

Computer Science Engineering graduate with a strong academic background and hands-on industry experience in software development. Passionate about building practical software solutions, exploring Artificial Intelligence, and solving real-world problems. A quick learner with strong analytical and problem-solving skills who enjoys collaborating with teams and is eager to contribute and grow as a software engineer.

EDUCATION

Infant Jesus School 10 th (KSSEB)-92.48%	March 2020 Bangarpet, India
Infomatics National PU College 12 th (PCMB) – 95.67%	May 2022 Bengaluru, India
M.S. Ramaiah University of Applied Sciences B. Tech in CSE – 9.41 CGPA	June 2026 Bengaluru, India

EXPERIENCE

Software Developer Apprentice <i>Target Corporation India Pvt. Ltd.</i>	Feb 2026 – July 2026
Developed enterprise Generative AI applications using Java and Praxis on Target's internal cloud platform (TAP), leveraging RAG, Model Context Protocol (MCP) , and REST APIs to automate infrastructure workflows. Built AI solutions including a Text-to-SQL assistant for device telemetry analysis, an AI self-service assistant integrating enterprise APIs for device management, and an incident analysis assistant that generated work notes, updated ServiceNow , and automated operational reporting. Collaborated in an Agile environment using Jira, GitHub, and Confluence to deliver scalable internal software solutions.	

PROJECTS

Electricity Billing System	<i>Java, Swing, JDBC, MYSQL</i>
Developed a role-based desktop application for electricity billing and customer data management using Java Swing. Implemented CRUD operations for customer records and bill generation through JDBC–MySQL integration. Designed event-driven, modular GUI components using Swing listeners to ensure clean separation of concerns. Applied structured exception handling and relational database design to maintain data integrity across billing workflows.	
Smart Counsel – AI-Driven College Admission Predictor for KCET	<i>Python, Pandas, Scikit-learn, Matplotlib, Random Forest</i>
Developed a machine learning system to predict college admission cutoffs for KCET aspirants using historical data. Performed preprocessing, feature engineering, and training using Scikit-learn to ensure accurate predictions. Trained and benchmarked regression models, with Random Forest achieving R² = 0.9360 and RMSE ≈ 8720 for superior performance.	
Recipe Finder Web Application	<i>JavaScript, REST API, Web Architecture flow.</i>
Architected and developed a modular, responsive web application integrating TheMealDB REST API for dynamic recipe discovery and data retrieval. Implemented asynchronous data pipelines, event-driven components, and client-side persistence using localStorage for offline caching and state management. Optimized front-end performance through DOM virtualization , lazy loading, and reusable UI modules, ensuring scalability and cross-device responsiveness.	

SKILLS

Languages: Python, Java, HTML, CSS, JavaScript(basics)
Frameworks/Libraries: Java Swing, Flask(basics), NumPy, Pandas, Matplotlib, React (Basics)
Databases: MySQL
Concepts: Operating Systems, Data Structures and Algorithms, Software Testing, DBMS, SDLC, REST APIs, JSON
Tools: Git, GitHub Actions, Jupyter notebook, VSCode, Postman, Linux, GitHub Copilot, Jira

CERTIFICATIONS

Programming in Java (NPTEL)	Data Cleaning (Kaggle)
Python for Data Science (NPTEL)	AI Fluency Framework & Foundations (Anthropic)
Machine Learning Specialization (DeepLearning.ai)	
Agentic AI Certified Foundations Associate (oracle)	
SAP Certified – SAP Generative AI Developer (SAP)	
SQL and Relational Databases (IBM SkillsBuild)	
Programming Data Structures and Algorithms using Python (NPTEL)
